## **AMENDMENTS TO THE CLAIMS:**

1. (Currently Amended) A wale for use in bracing a retaining wall, said wale comprising:

a back wall;

a front wall having a channel formed therein and extending from a first end of the wale to

a second end of the wale; and

a plurality of connecting walls connecting said back and front walls to form at least one

chamber between said back wall and said front wall, said plurality of connecting walls includes a top

wall, an upper reinforcing wall, a lower reinforcing wall, and a bottom wall, and wherein a plurality

of chambers are formed between said back wall and said front wall;

and wherein said channel has a depth sufficient such that when said wale is secured to said

retaining wall by a tieback rod passing through said wale and a fastener, said tieback rod and said

fastener do not protrude from the channel.

2. (Currently Amended) The wale of claim 1 wherein said wale is of a unitary construction and

said plurality of connecting walls includes a top wall and a bottom wall, and wherein a single

chamber is formed between said back wall and said front wall.

3. (Canceled)

Pateni

4. (Original) The wale of claim 1 wherein said wale further comprises a pultruded composite

material.

5. (Original) The wale of claim 4 wherein said composite material is fiberglass reinforced

plastic resin impregnated composite.

6. (Currently Amended) A retaining wall wale, comprising:

a back wall

a front wall having a top portion and a bottom portion interconnected by a C-shaped channel

portion extending from a first end of the wale to a second end of the wale;

a top wall connecting said back wall to said top portion; and

a bottom wall connecting said back wall to said bottom portion to form a chamber between

said back wall and said front wall;

an upper reinforcing wall and a lower reinforcing wall each connecting said back wall to at

least one of said top portion, said C-shaped channel portion, and said bottom portion such that a

plurality of chambers are formed between said back wall and said front wall;

and wherein said channel portion has a depth sufficient such that when said wale is secured

to a retaining wall by a tieback rod passing through the said wale and a fastener, said tieback rod and

said fastener do not protrude from the channel portion.

7. (Original) The wale of claim 6 wherein said wale is of a unitary construction and further comprises a pultruded composite material. further comprising:

least one of said top portion, said C-shaped channel portion, and said bottom portion such that a plurality of chambers are formed between said back wall and said front wall.

## 8. - 27. (Canceled)

- 28. (Currently Amended) A wale for use in bracing a retaining wall, said wale comprising:
- a back wall having a first opening therein and operable for receiving a tieback rod therethrough;
- a front wall having a channel formed therein <u>extending from a first end of the wale to a</u> second end of the wale and having a second opening therein and operable for receiving the tieback rod therethrough;
- a plurality of connecting walls connecting said back and front walls to form at least one chamber between said back wall and said front wall; and wherein said wale is of a unitary construction.

ATTORNEY DOCKET No. CREA01-00023 U.S. SERIAL No. 10/619,131

**PATENT** 

29. (Previously Presented) The wale of Claim 28 wherein said channel has a depth sufficient

such that when said wale is secured to a retaining wall by a tieback rod and a fastener, said tieback

rod and said fastener do not protrude from the channel.

30. (Previously Presented) The wale of claim 28 wherein said plurality of connecting walls

includes a top wall, an upper reinforcing wall, a lower reinforcing wall, and a bottom wall, and

wherein a plurality of chambers are formed between said back wall and said front wall.

31. (Previously Presented) The wale of claim 28 wherein said wale further comprises a pultruded

composite material.

32. (Previously Presented) The wale of claim 31 wherein said composite material is fiberglass

reinforced plastic resin impregnated composite.

33. (Previously Presented) The wale of claim 1 wherein said back wall and said channel each

comprise an opening therein and operable for receiving said tieback rod therethrough.

ATTORNEY DOCKET NO. CREA01-00023 U.S. SERIAL NO. 10/619,131 PATENT

34. (Previously Presented) The wale of claim 6 wherein said back wall and said C-shaped channel portion each comprise an opening therein operable for receiving said tieback rod therethrough.
